About Window Wise DUO Composite Doors

A stylish front door is one of the first impressions of your home – so why not make it as individual as you are?

Whether you prefer time honoured and traditional or modern and contemporary the wide range of composite doors from Window Wise will provide you with a wide choice of styles and colours.

Most composite doors manufactured in the UK are only 45mm thick - the Duo Traditional range is 68mm thick whilst the Duo Contemporary is 70mm thick - providing a more solid and consequently far stronger door with enhanced energy efficiency and security.

Creating a great first impression, lasting durability and peace of mind.

Why choose a Composite Door?

Composite doors offer the look and feel of a traditional timber door with a range of additional benefits.

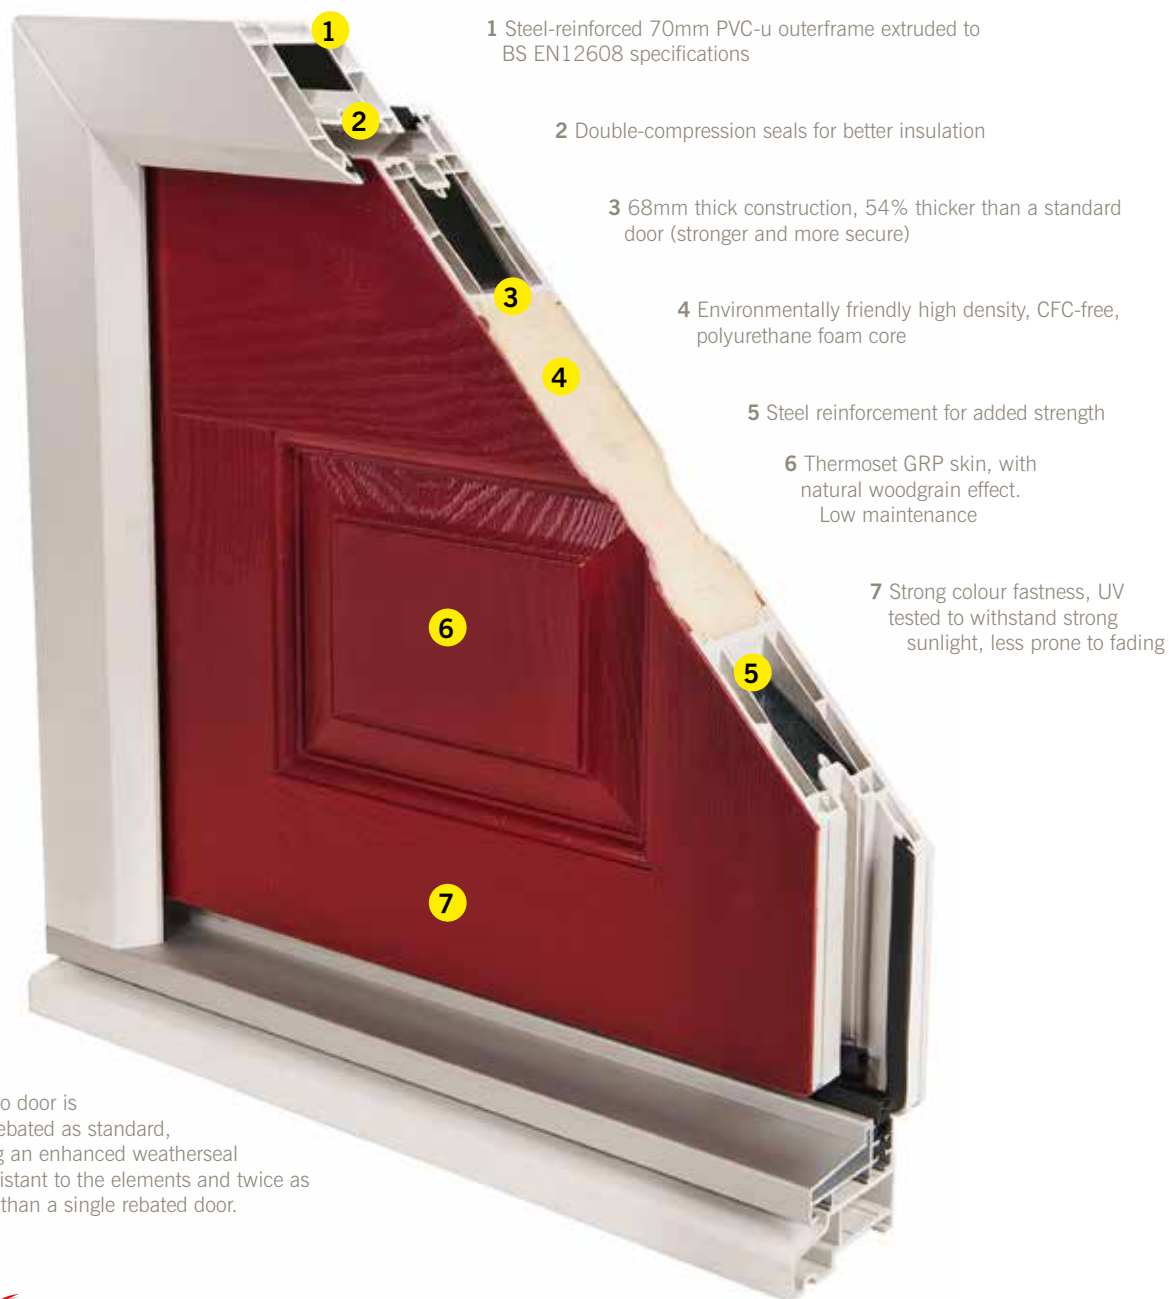

This modern, low-maintenance door will never rot, swell, crack, warp or need repainting, dramatically improving insulation and energy efficiency.

More and more people are turning to composite doors to make their homes safer and more secure. Window Wise Composite Doors provide a formidable barrier against would-be intruders, while offering a stylish welcome to guests. Thanks to the steel reinforcement and multipoint locking systems, each duo door has been approved by the Police initiative 'Secured by Design'.

The Benefits of a Composite Door

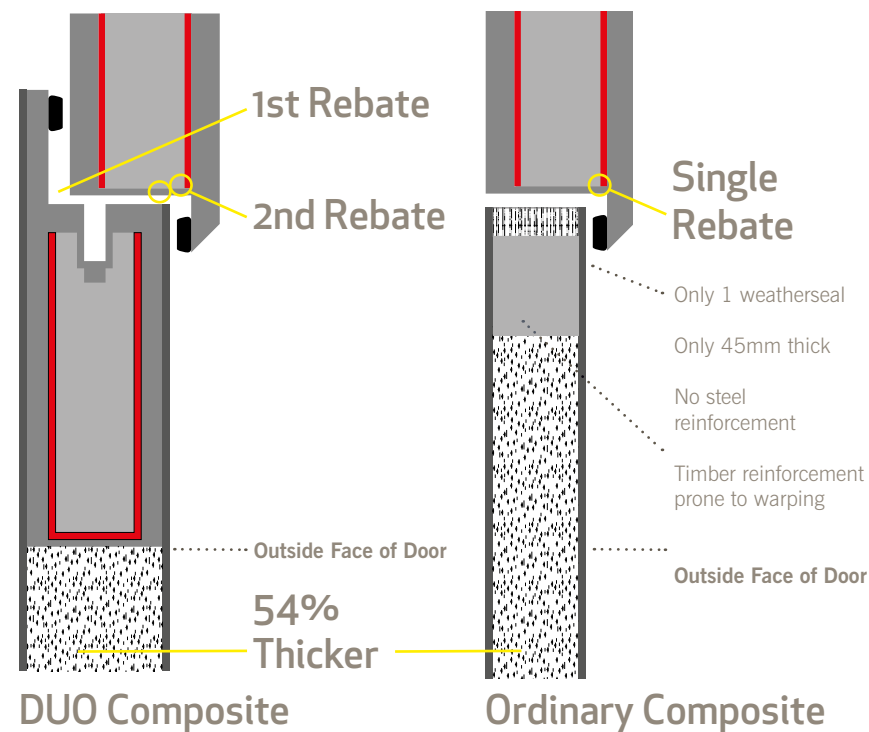

- Low maintenance
- Enhanced energy-efficiency
- Aesthetically pleasing
- Highly resistant to weathering
- Solid and robust - able to withstand any knocks and bumps
- More secure than a traditional timber door
- Wide selection of colour and hardware finishes
- Greater acoustic insulation
- Low-threshold option

What makes a DUO Composite Door so special?

Every duo door is double-rebated as standard, providing an enhanced weatherseal more resistant to the elements and twice as effective than a single rebated door.

What is a DOUBLE-REBATE?

U-VALUES

All doors must have a 'U-Value' of 1.6 or less so as to comply with British Building regulations. The lower the 'U-Value', the greater the insulation offered by the design.

All Window Wise DUO Composite Doors have a 'U'-Value of below 1.6 or even less.

DUO doors - flawless performance

Not all composite doors are the same. You need to know that you're choosing a door that will last: a door that offers the ultimate in security and energy efficiency.

The performance of each Window Wise DUO door is fully guaranteed for ten years, every door has been stylishly designed, to provide decades of low-maintenance.

Your front door is the first thing to greet any visitor and a well-selected door can not only improve the look of your home and increase its security and energy efficiency, it can also raise the value of your property.

The DUO range offers a number of benefits over many other composite doors:

- 'A'-rated energy efficient as standard: for outstanding thermal performance
- Door leaf and frame manufactured in Britain
- 54% thicker than a standard composite door
- Galvanised steel reinforcement
- Improved thermal and acoustic insulation thanks to double compression seals
- Triple glazing available: for better heat retention and noise reduction
- Doors come fully framed and glazed, with hardware
- Available in a choice of colours, with a woodgrain finish as standard on both sides
- Woodgrain doors available with close-matching woodgrain frames as an option

Shhhh!

The double rebate of each DUO door not only helps lower your heating bills, it also helps you leave the stresses of the outside world behind when you close the door.

Your home will be a quiet and relaxing haven, closed off from the sound of traffic and noisy neighbours thanks to the DUO doors' high density core. Because each door in the range is 54% thicker than a standard door, you can expect much more peace and quiet. Triple glazing is available on selected styles within the range, further improving acoustic insulation.

Safe and sound

Every Window Wise DUO door is fitted with an extremely secure multipoint locking system. When fitted into a 68mm DUO door (54% thicker than a standard door) you have a door that can offer the highest levels of security.

From start to finish, DUO doors are designed and manufactured in the UK to meet or exceed all current British Standards. These include PAS23 and PAS24.

Each door has been designed to provide a formidable barrier against even the most determined intruder - so you know that all your visitors will be by invitation only!

The high quality sub-frame is individually constructed to match every door size exactly, without 'cutting it down to fit' and has galvanised steel reinforcement in both the door frame and outer frame. The DUO door combines strength and stability with robust joints locking everything tightly in place.

54% thicker than most standard composite or timber doors, the Window Wise DUO Composite Door range offers complete peace of mind.

All DUO doors can be fitted with a number of alternative locking and entry systems. The multi-point auto-locking system is fitted as standard but at additional cost there is a choice of three exclusive automated entry systems, either by a numbered keycode, transponder or fingerprint sensor.

Escutcheon Lock

A Window Wise DUO Composite Door will provide you with the utmost security, so you can have peace of mind that you will be safe and secure in your own home

A choice of high quality hardware is available to complement each door. With a choice of black, white, chrome or gold and aside from handles and letterplates, you can choose features such as door knockers, security chains, and even spyholes!

A unique feature of the DUO door is the additional high-security, concealed hinge bolts.

Forgot your house keys?

Never experience that 'locked-out' feeling again! We've taken electronic locking for vehicles as THE normal way of securing and unsecuring our cars - we can now offer the same, if not better, ways of securing your home too - from a keypad using a simple PIN number, a transponder that can be programmed to work with your car remote and a finger-print reading touchpad. For convenience, for security and for NOW!

KEYCODE

Access to your home via a simple numeric keypad.

TRANSPONDER

Access to your home via the reader unit using a car key, almost all car marques are compatible with this solution. Multiple car keys, transponder chips or cards can be read.

FINGER-PRINT

Access to your home via finger-print recognition - a master 'finger-print' can be installed by remote control and used for as many keyholders as necessary.

Choose a colour

Why not?

SPLASH OUT!

with a whole world of new possibilities

Both DUO Traditional and Contemporary doors are now available in any colour you like for an even more personal touch

Just pick a colour. Any colour!
Once you've picked your colour we can even colour the frames to match your new door*

Go on... splash out!

DUO TRADITIONAL doors are available in this standard range of colours and finishes...

...or at extra cost, in any RAL colour of your choice

* Please note. White is the standard colour for DUO Contemporary, any RAL colours are available at extra cost.
Frames are only available in solid colour, not woodgrain. RAL coloured frames are available at extra cost.

Match a frame

Door frames are available in White, or foiled with Golden Oak, Rosewood or a wide range of solid colours.

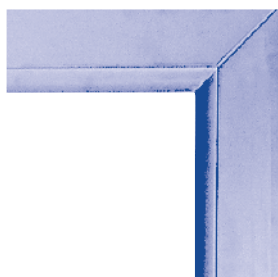

WHITE

CHERRYWOOD

ANTIQUE MAHOGANY

OR ANY SPRAY-FINISHED RAL COLOUR OF YOUR CHOICE

Panel finish

The Contemporary Range of doors have a choice of panel finish - either a flat, continuous plane that emulates a single piece of timber or, a 'planked' plane that creates the impression of the door being constructed using narrow timber boards.

Specify the hardware

Hardware is also available in satin, chrome, gold, black or white, apart from the spyhole and door chain which are only available in gold or chrome.

* Door 'U'-value can vary slightly depending on door size and glass type.

A stylish welcome

A stylish front door is one of the first impressions of your home - why not make yours as individual as you are?

With such a wide range of colours, styles, glazing and finishing options - you'll probably never see another DUO door like yours.

Whether you prefer time-honoured and traditional, or contemporary and cutting-edge, you can choose a door style to suit you and your home. The choice of colour, glass, furniture and finish means there are thousands of possible combinations. You can even complement your door with matching side panels, sidelights and toplights.

The DUO door range has been designed with symmetry and style in mind; each one is finished with attention to detail and built in Britain, using the strongest, low-maintenance materials.

Thanks to their extra sharp woodgrain definition, they are virtually indistinguishable from a traditional timber door, but have a range of modern advantages.

The tough GRP skin means your door will withstand any knocks and scratches, and it has been developed to withstand extreme UV testing, so it will not fade in strong sunlight.

A well-made, well-chosen door will improve not only the appearance, but also the value of your home.

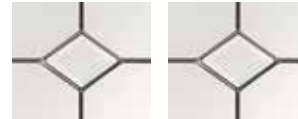

- A great range of colours and styles to choose from with the DUO range
- The low threshold option means these doors minimise a potential trip hazard and provide easy access
- White, Rosewood or Golden Oak frames are available as standard
- There is an exclusive range of decorative glass designs to choose from
