HARDWARE

FINISHES

Available in eight powder coated, matt colours, with the option of choosing a different colour for the interior to help you find the look that is right for your property.

The colour choice for your bi-folds may require a different appearance from outside that may be less desirable from inside. We offer you the flexibility to have a different colour internally

to whatever you choose externally, this option naturally incurs a dual colour surcharge.

In this typical four-leaf configuration we have a transit door that hinges to one side whilst the remaining leaves can slide to the other side for a complete opening.

However, the first leaf of the sliding doors can offer an additional choice of opening effectively becoming a French door.

The transit door is the term that describes the day-to-day functionality of your bi-folds - it's the door that gives rapid

access using a conventional door handle and avoids having to open the entire door for access.
